

Catamount 2026 Spring Walks & Work Projects

Catamount Project: Saturday, May 23rd, 9:45 am,
Rain date: Sunday, May 24

Mapping & Measuring Shippee cellar holes at their farm yard. We plan to measure the size of the Shippee house, outbuildings, and the distance to their milk-house, henhouse, barn, and sugar house because that information is important to our understanding of their lifestyle. Hopefully, some Shippee descendants will attend, but this walk is open to everyone. If you have equipment for measuring 25 feet or more, please bring it; and we would like someone to take pictures during this project.

Meet at West Branch Cemetery, Adamsville Road, at 9:30 am. Due to limited parking space, we will car pool. Please bring your lunch, water, and dress according to the weather forecast. It can turn cold fast and, if needed, please use unscented bug dope.

Rock Bridge Catamount Project: Saturday, June 6th, meet at 9:30 am at West Branch Cemetery, Adamsville Road

Fixing the Historic Cary Rock Bridge Project! Someone strong has been moving the rocks which form one of Catamount's historic rock bridges and their rearrangement of rock changed the flow of water under that bridge. So, we need a few strong young men to set the rocks back in a row, where they belong. Please bring lunch, water, and dress for changing weather. If needed, please use unscented bug dope.
